SUMMARY

Full-stack developer and founder of Elevenstack Digital Agency, building production-grade, multi-tenant SaaS platforms end-to-end for clients across hospitality, travel, and retail. Skilled in leveraging AI-assisted development tools (Claude, Cursor, Google Antigravity, Cline) to accelerate the full product lifecycle – from database architecture and Row-Level Security design to deployment and post-launch iteration. Delivered 4+ live client products spanning hotel management, POS, GST billing, and CRM/ERP domains, combining strong ownership with rapid execution as a solo builder.

EDUCATION

Bhaskar Engineering College <i>Bachelor of Engineering – Computer Science and Engineering</i>	Hyderabad, India 2023 – 2027
---	---------------------------------

EXPERIENCE

Founder & Solo Developer <i>Elevenstack Digital Agency</i> – Delivered 3 production software products end-to-end for real clients using AI-assisted development workflows (Claude, Cursor, Google Antigravity) — solo, while studying full-time. – Reduced development cycles by 60%+ by integrating LLM-native workflows: AI-driven architecture, prompt-based debugging, and rapid prototyping with Vite + React + Supabase. – Managed full project lifecycle — client requirements, UI/UX, backend, deployment, and post-launch support — for SMB clients in the Indian market. – Built and deployed cloud-native SaaS products with multi-tenant Supabase (PostgreSQL + RLS), Cloudflare Pages, and Razorpay payment integrations.	Hyderabad, India 2025 – Present
--	------------------------------------

PROJECTS

SignInn – Hotel Management SaaS <i>React, Supabase, Razorpay, Cloudflare Pages</i> – Built a full-featured multi-tenant Hotel Management SaaS in 3 days using AI-assisted development with Claude and Cursor — from zero to production. – Features: role-based access control, GST invoicing, Razorpay subscriptions (UPI-ready), WhatsApp notifications, Tesseract.js OCR for guest ID scanning, group bookings, dynamic pricing with festival rules, and OTA channel manager integration. – Implemented Supabase Row-Level Security (RLS) for bulletproof multi-tenant data isolation across unlimited hotel properties. – Deployed on Cloudflare Pages with GitHub Actions CI/CD; migrated backend from Express/Render to Supabase Edge Functions for zero-cost scaling.	https://signin.pages.dev/
Eazy-Bill-Pro (KiranaBook) – Kirana POS System <i>React, Next.js, Supabase, PWA</i> – Built an offline-first PWA POS system for Indian grocery retail with IndexedDB sync, Bluetooth thermal printer support (58mm ESC/POS via Web Bluetooth API), and dynamic UPI QR code generation. – Features: loose vs. packaged inventory tracking, CSV bulk product upload, A-Z product filter, mobile-responsive billing UI, and end-of-day shrinkage reports. – Developed entirely using AI coding tools; entire UI designed and built prompt-first using Cursor and Claude.	https://eazybillpro.vercel.app/
Travel Bill Pro – GST Billing SaaS <i>React, Supabase, Cloudflare R2</i> – Converted a single-client GST Billing PWA into a multi-tenant SaaS product with three-step onboarding, Cloudflare R2 PDF storage, and Supabase multi-tenant schema. – Targeting Indian travel agencies for GST-compliant invoice generation; built and deployed solo using AI-assisted coding workflows.	https://hdt-billing-system.vercel.app/

SKILLS

AI Coding Tools: Claude, Cursor, Google Antigravity, Cline (VS Code)
Languages: JavaScript, Python, HTML, CSS
Frameworks & Libraries: React, Next.js, Vite, Tailwind CSS, Node.js
Databases: PostgreSQL (Supabase), SQL, IndexedDB
Dev Tools: Git, GitHub Actions, Cloudflare Pages, Vercel, Razorpay API
Concepts: Multi-tenant SaaS, Row-Level Security, REST APIs, PWA, CI/CD, Edge Functions
